STEP BY STEP GUIDE

Assistini WordPress-Plugin

1

System Requirements

Before installing Assistini, make sure your website meets the following minimum requirements:

- WordPress version: 6.2 or higher
- Tested up to: 6.8.2
- PHP version: 8.0 or higher
- Max execution time \geq 60 Seconds

For full details, see: [Assistini System Requirements](#)

2

Installation and Activation

- 1) Log in to your WordPress dashboard.
- 2) Navigate to "**Plugins**" -> "**Add New**".
- 3) Search for "**Assistini**".
- 4) Click "**Install Now**", then "**Activate**".
- 5) After activation, you'll find the Assistini menu in your WordPress sidebar.

5

Quick Guide Feature

If you prefer a faster workflow, use the [Quick Guide](#) feature to instantly generate short-form content such as product descriptions, announcements, or meta descriptions with minimal input.

6

AI Editor Assistant

The [AI Editor Assistant](#) lets you write, edit, and optimize content without leaving the WordPress editor.

- Rewrite paragraphs for clarity.
- Improve SEO and readability.
- Generate intros, conclusions, or calls-to-action with one click.
